Time is money. The time you spend researching, securing and operating warehouse and transportation solutions amounts to money lost.

»» **That's why you should leave it to us.**

Our shared logistics services give you a single source for your warehouse and transportation needs. With more than 1,000 employees and over three million square feet of warehouse space, ODW Logistics' supply chain solutions are unparalleled in the industry. We seek to build *trust* with our customers, associates and partners based on a foundation of a great *team* who maintains a healthy *balance* of work and life.

ODW Logistics Delivers

Since 1971, ODW Logistics, Inc. has been an industry forerunner in supply chain solutions for companies of all sizes. We are a full-service third party logistics (3PL) provider with the technology, infrastructure and personalized service to support all business needs. There are three segments within the umbrella of ODW Logistics, Inc.: ODW Warehousing Group, Dist-Trans, Co., and ODW Logistics and Transportation Services (LTS). These three business segments seamlessly work together to serve our customers' needs.

About ODW Warehousing Group:

The ODW Warehousing Group operates both shared and dedicated warehousing sites throughout the country. This means costs are also shared across all clients. Our warehousing facilities use state-of-the-art inventory management systems to ensure proper tracking of goods as they enter and leave a facility. Our experienced contract logistics team specializes in the design, implementation and management of third-party distribution operations. We offer unique, cost-sensitive, turnkey solutions for companies with specific distribution requirements.

About Dist-Trans, Co.: Dist-Trans, Co. is our own asset-based regional carrier that serves warehouse clients in addition to a non-warehouse client base. Our truck fleet offers regional transportation service, drayage service and yard management services (YMS).

About LTS: LTS is a full-service, 3rd party transportation solution. We offer both warehouse clients and non-warehouse clients freight services including: transportation management, brokerage, consulting, network analysis, optimization, reverse logistics, freight pay and audit. LTS is an expert in multiple modes of transportation such as truckload, less than truckload (LTL), inter-modal, partial, time-sensitive, and international freight.

Technology Driven Supply Chain Visibility

ODW Logistics provides the latest in technological offerings to effectively manage our customers' distribution networks. Our productivity-oriented tools, combined with your desire for open source capabilities, lets you leverage our innovative technology platforms without additional expense or risk. We process over 100,000 transactions daily and our technology plays an integral part in this role.

Our technological solution is an integrated platform that we customize based on our clients' needs. Our Service Oriented Architecture (SOA) is the framework that helps us provide a unique user experience. From our web-based customer service tools to our state-of-the-art dual Warehouse Management Systems (WMS) and Transportation Management System (TMS), ODW provides reliable and secure cross-platform capability and simple data access.

- EPA Smartway Carrier

»» Our Technological Capabilities include:

Service Oriented Architecture (SOA):

Core technology and flexible web-based building blocks are used to efficiently collaborate with our customers and create an agile technological model to meet today's dynamic market demands. We have the ability to leverage SOAP and RESTful web service protocols to integrate business to business automation.

SCOREBOARD Warehouse Management

System: SCOREBOARD is ODW's own web interface through which inventory data is available via the Internet. This sophisticated, real-time platform is our customers' secure interface to ODW's Warehouse Management Systems (WMS). The user-friendly web menus allow users to navigate easily to critical operational information.

FreightLink Transportation Management

System: This system allows users to check freight costs, enter shipment pick ups and track shipment locations. By providing a unique log-in for each user, customers can view the status of each of their shipments, regardless of the mode. The system also offers customizable freight reporting features.

Additional Technologies:

- Electronic Data Interchange (EDI)
- Radio Frequency (RF) Technology
- Voice Pick Technology
