ODW Logistics, Inc.

DEMAND-DRIVEN LOGISTICS™ Overview

We've Got RANGE

WHAT YOU NEED

Today's manufacturing industry necessitates 21st-century solutions; our marketplace requires manufacturers to produce at a pace to meet global demand. As need for a product grows, the manufacturer must do so too in an economical and profitable way. ODW Logistics, Inc. provides a *Demand-Driven Logistics™ solution* to help you meet these time-sensitive challenges using our Andon Visual Technology (AVT).

ODW becomes a beacon for manufacturers by providing core logistics services from the time freight leaves a supplier to the time it becomes a finished good. In this process, you want visibility, accuracy and scalability, while using LEAN-principles to get the job done in a collaborative partnership.

Visibility – Using our Andon Visual Technology, you can see where your products are in the inbound and outbound processes. Our AVT system can show you where your products are from receipt to point-of-use using this customized system.

Scalability – Whether it is the management of material flow or improvements to lineside delivery, you want to know that your partner has the capacity to grow with your needs and your company.

Accuracy – As a manufacturer, inventory accuracy and the assurance your material is at its point of use are essential to operating your assembly line at peak performance. ODW's Demand Driven Logistics™ solution helps your company maintain accuracy to save time and money.
